

OVPH Sustainable Procedure Policy

Purpose: The purpose of this policy is to support purchasing of products that minimize their harmful effects on the environment. Old Village Post House recognizes the importance of purchasing the products when they perform well and are available at affordable prices.

Policies:

- OVPH should promote the use of environmentally friendly and recycled products by publicizing the program.
- OVPH will purchase environmentally friendly and recycled products whenever possible.
- OVPH will make efforts to secure contracts with vendors that are environmentally conscientious whenever possible.

Responsibilities of Departments

OVPH is committed to conserving and protecting the environment. Management in all departments will be responsible for promoting the use of environmentally friendly products. OVPH will seek suppliers and encourage existing ones to review their packaging and work to reduce their waste. OVPH will continue purchasing food without hormones, chemicals or harmful fertilizers, and when possible will purchase free-range and sustainably raised. We will purchase recycled or biodegradable products with the maximum level of post-consumer reusable or recycled waste when economically feasible.
